## 1) The Event:

A rallycross is a timed event for automobiles, generally held on an unpaved, flat surface, wherein the course consists of straight sections and connecting turns and corners. Accent in course design is also placed on the general avoidance of obstacles such as trees, exposures, deep ditches, etc. Surface terrain will be gravel, some ridges and bumps, and the possibility of large spots of standing water or snow depending on weather conditions. Competitors run the course one car at a time. The runs are timed and the fastest car in each class is the winner. Because of the shortness of the track and the frequency of tight turns, speeds are quite slow, and the emphasis is on driving skill and car setup. The rallycross event will take place at the Pemberton Stockcar Association, located 22 kilometers North of Whistler, BC. The specific location at the stockcar association complex is the infield of the dirt oval and the perimeter road around the southwest end of the track.

There are some site-specific rules that all competitors should be aware of.

- The speed limit in the service area and main access road is a maximum of 10 km/h.
- Any competitor caught driving, or reported to have driven, on any part of the oval track, motocross course or 4x4 area will be disqualified and banned from future events. The previously listed areas are out of bounds.
- All members of SBRCC and all participants of SBRCC rallycross events are expected to drive on public roads in a manner that reflects well on the club and motorsport in general. Penalties for non-compliance (up to exclusion from events) may be levied at the discretion of an SBRCC executive member.
- Competitors are encouraged to bring fire extinguishers.
- Competitors must provide a tarp to park their vehicles on while in the service area.
